Question 1

Find four inequalities that define the region, R, on the grid.

[4]

Question 2

Find the four inequalities that define the region that is **not** shaded.

[5]

Question 3

Write down the 3 inequalities which define the unshaded region.

[4]

Question 4

By shading the **unwanted** regions of the grid above, find and label the region R which satisfies the following four inequalities.

$$y \geq 2$$

$$x + y \geq 6$$

$$y \leq x + 4$$

$$x + 2y \leq 18$$

[4]

Question 5

(a) Draw the three lines $y = 4$, $2x - y = 4$ and $x + y = 6$ on the grid above. [4]

(b) Write the letter R in the region defined by the three inequalities below.

$$y \leq 4$$

$$2x - y \geq 4$$

$$x + y \geq 6$$

[1]

Question 6

By shading the **unwanted** parts of the grid above, find and label the region R which satisfies the following three inequalities

$$y \geq 3,$$

$$y \geq 5x \quad \text{and}$$

$$x + y \leq 6.$$

[3]
