

## George Wang

**Age:** 23

**Education:** BS CUHK(SZ)

**Hometown:** Shenzhen

**Family:** Single

**Occupation:** Math Teacher

*“Teaching is evolving, and I want to evolve with it. I need tools that simplify digital education, not complicate it.”*

### Goals

- To efficiently manage online classes and distribute educational materials.
- To track student progress and provide individualized feedback.

### Frustrations

- Challenges in adapting traditional teaching methods to a digital format.
- Difficulty in keeping students engaged in a virtual environment.

Mr. George has been teaching math for about 5 years. He finds it challenging to keep his students engaged and track their progress effectively online. He is looking for an app that simplifies the administrative aspects of teaching and allows him to focus more on interactive and personalized education. The app should enable him to provide a more immersive and engaging learning experience, bridging the gap between traditional and digital education.
